

For faster start of gasoline and diesel engines

MOTOSTART[®] spray

MOTOSTART[®] spray is product for faster engine start, produced on the basis of easily volatile and flammable components and solvents.

ADVANTAGES

- It is suitable for diesel and gasoline engines (two-stroke and four stroke),
- It provides easy start in all weather conditions.
- It prevents exhaustion of the battery during engine cold start.

QUALITY LEVEL

FAM FSP 169358

APPLICATION

MOTOSTART[®] spray facilitates engine start in cars, buses, trucks, tractors, motocultivators, fork-lift trucks, ships and construction machinery, especially in winter.

MOTOSTART[®] spray is injected into suction air system of the engine for the duration of 2-3 s. Start the engine immediately. Most engines start in 10 seconds, even at the temperatures up to - 46°C.

When applying **MOTOSTART[®] spray** do not turn fuel heaters on.

TYPICAL CHARACTERISTICS

CHARACTERISTICS	UNITS	MOTOSTART[®] spray <i>(active substance)</i>	METHODS
Appearance	-	clear	visual
Density at 15°C	g/ml	0.695	SRPS EN ISO 3675
Water content	%	does not contain	ASTM D 1744

NOTES FOR SAFETY AT WORK

- The product must not be applied to heated surfaces or near the open flame,
- The bottle is under pressure, keep it away from heat source and sun.
- Do not destroy it and do not burn it even when it is empty.

STORAGE

Store in a confined area intended for the storage of flammable materials. Tightly closed original containers should not be stored in places exposed to direct sunlight, nor at temperatures below 5°C. All necessary instructions can be found in the Safety Data Sheet. It contains details of possible hazards, warnings and first aid measures, as well as the environmental impact and the necessary measures when storing.
